HONEYCOMB TECHNOLOGY FOR SHIPS AND YACHTS

LIGHTWEIGHT CORES FOR MARINE
STRUCTURES OFFERING DURABILITY,
CORROSION RESISTANCE, AND FUEL
EFFICIENCY.

SHIPS AND YACHTS

LIGHTWEIGHT MATERIALS FOR SHIPBUILDING

Our ultra-lightweight panels are ideal for shipbuilding. They combine very low weight with high stability and strength. The panels offer excellent resistance to moisture and saltwater, making them a perfect construction material for ships and yachts.

ADVANTAGES

- low weight
- dimensionally stable and durable
- easy installation
- reduced fuel consumption

INTERIOR FIT-OUT

Due to their lightweight and robust construction, honeycomb panels are also very well suited for the interior fit-out of ships and yachts. For example, partition walls, ceilings, door leaves, cabinet elements, and other interior furnishings can be made from the panels without adding much weight.

FURNITURE CONSTRUCTION FOR USE ON SHIPS AND YACHTS

Whether kitchen cabinets, wardrobes, or a complete living room setup – both ships and yachts require a large number of furnishings that, in total, can be quite heavy.

RACING YACHTS

BLOOH Solution supplies honeycomb products to top teams in maritime regattas. These races are the ultimate test for our materials to demonstrate their suitability for maritime applications.

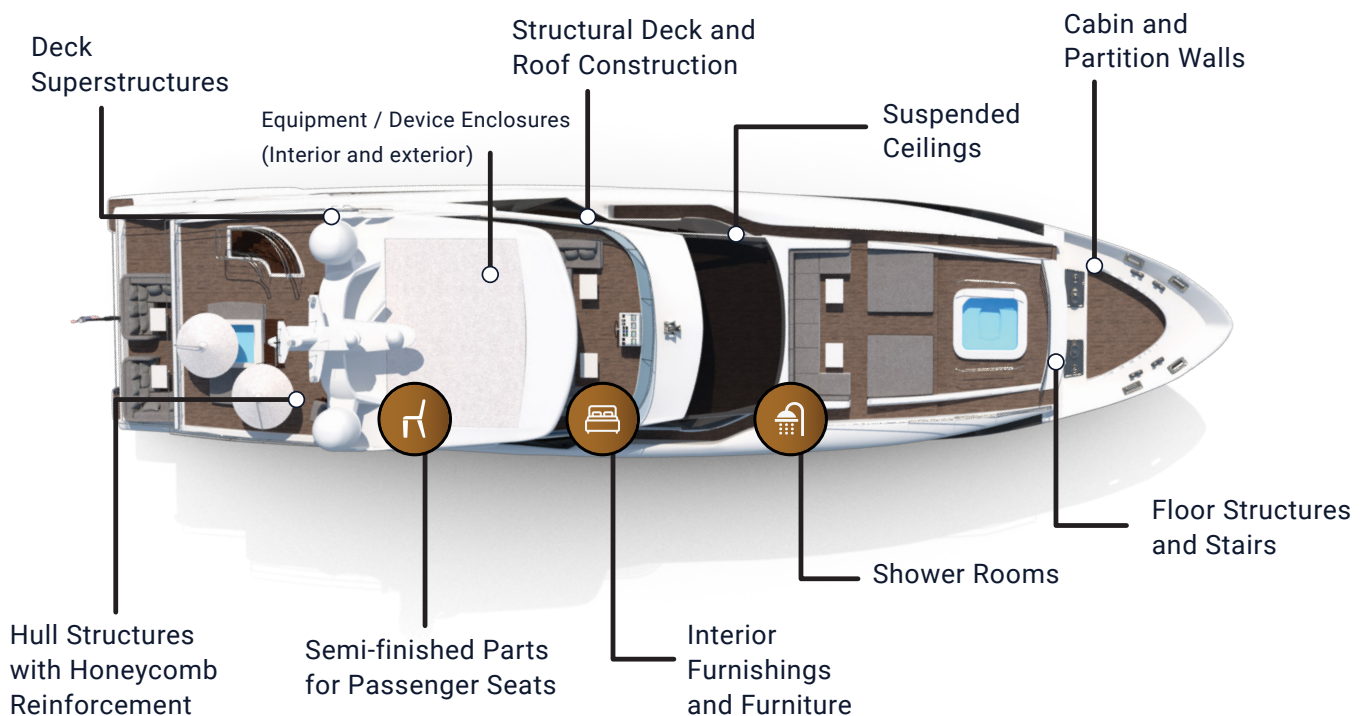

We provide our high-end composite structures for maximum material performance in the following regattas:

- Volvo Ocean Race
- Vendee Globe
- Wally Class

OTHER APPLICATIONS

- Walls (cabins or public areas)
- Ceilings (cabins or public areas)
- Wet rooms
- Balconies
- Window skylights
- Hatch covers
- Foldable covers for inland vessels
- Canopies for outdoor decks
- Yacht interior fit-out
